difference

DYNAMIC BRAKING RESISTORS
FOR AC OR DC DRIVES, STARTING
AND SPEED REGULATION USES.
SPECIALLY DESIGN FOR RAPID
BRAKING OR OVERHAULING
APPLICATIONS.

- Prevent over voltage trip
- Prevent overheating during normal braking cycles

Features

- Isolated for 1000V AC/DC
- Resistor wired with high temperature wire
- Wall or roof mount

Electrical Specifications

- 600V Class
- 500 to 25,000W

Options Available

- Thermal overload (NC contacts)
- Resistance and wattage values
- Custom assembly
- Open type available
